

Mine Action Coordination Centre of Afghanistan  
(MACCA)

---

**Mine Action Programme of Afghanistan (MAPA) Fast Facts**  
Data as of 11 March 2010<sup>1</sup>

**Scope of the Problem:** As of 11 March 2010, there were 6,688 hazards remaining affecting 660 sq km and 2,110 communities throughout the country.

**Casualties:** In 2009, an average of 40 Afghans were injured or killed every month due to mines and ERW. However this shows a significant decrease on previous years and the lowest in a decade.

**Mine Clearance:**

- In January and February, the MAPA conducted mine clearance in 19 communities; clearing or cancelling 56 minefields and 2 battle areas, destroying 1,727 anti-personnel mines, 135 anti-tank mines and 110,194 Explosive Remnants of War.
- Since the beginning of the programme 20 years ago, the implementers of mine action have cleared over 15,000<sup>2</sup> hazard areas throughout the country. 84 Districts and 1,370 communities have been cleared of mines and other explosive remnants of war.
- Under the 2006 Afghanistan Compact the area contaminated by mines and explosive remnants of war must be reduced by 70 per cent by March 2011. The MAPA has progressed 58% in terms of area and 56% in terms of number of hazards towards this goal of a 70% reduction.
- The Ottawa Mine Ban Treaty requires total clearance by 2013. The MAPA has progressed 41% in terms of area and 39% in terms of number of hazards towards this goal.
- New hazards continue to be found Afghanistan, increasing the challenge of the goals set by the Afghan Compact and Ottawa Treaty and affecting the progress towards them.

**Mine Risk Education:** 148,617 Afghans received MRE from January - February 2010. 41% were female.

**Disability/ Survivor Assistance:** MACCA and MAPA partners support three Government ministries (MoLSAMD, MoPH and MoE) to improve the services, policies and attitudes affecting persons with disability in Afghanistan. A total of 10,451 Afghans received disability awareness training in January and February 2010. Significant progress made by the Government in the area of mine survivors over the last year includes the passing by Parliament of a National Disability Law and ongoing discussions around the UN's Convention of the Rights of Persons with Disabilities (CRPD).

**Funding:**

- The MAPA Integrated Operational Framework (IOF) for 1389 sets out a funding target for mine clearance of \$242m in multilateral and bilateral funding - for projects to begin in 1389. If those projects are completed, some 157 sq km of contaminated land will be returned back to communities.
- At present there is a clearance funding shortfall of \$ 163 million against the target of the IOF
- Mine Risk Education and Victim Assistance advocacy requires \$2.8 million and currently has the entire amount pledged.
